

# iD TOP™

## Ceiling-Mounted RFID System With an Elegant, Unobtrusive Design

The iD Top is a state-of-the-art integrated RFID reader that can easily be mounted to the ceiling - using almost invisible steel cables or a standard VESA mount.

Its elegant, compact design blends into every store, keeping the entrance of the store wide open. The iD Top can be used stand-alone as RFID-based EAS system or as an RFID upgrade to existing traditional EAS systems.

### Key Benefits

- Dynamic Beam Steering technology which recognizes which way the tag is moving for significantly reduced false alarms
- Automatic Tag Muting which detects tags on displays close to the antennas, which improves customer and employee experience through fewer false alarms and errors
- API with SDK available for system integration, autonomous operation and buffered reads
- Optional remote management and steel cable set for ceiling mounting
- Nedap-CONTROLTEK partnership
