

LUMEN iL45™

8' Detection Range and Easily Upgradable to RFID

The Lumen iL45 contains state-of-the-art electronics that can easily be integrated, remotely updated and it's data made visible through dashboards, reports and an API. Updating this system from RF to RFID technology is a seamless process that makes the system complete future proof.

Key Benefits

- Intelligent communication through colored lights and different sounds
- Standard integrated infrared beam sensors for customer counting and/or direction detection
- RFID upgradeable; clip-in RFID upgrade kit available
- Real-time insight and control with in-store and organization-wide dashboards
- Device Management allows remote monitoring, remote log-in and online firmware update
- Open API for easy integration with other LP systems (like video surveillance)
- Patented OID (Orientation Independent Detection) technology which significantly improves detection rate of tags
- Nedap-CONTROLTEK partnership

Specifications

- Dimensions: 66.54 H x 18.19" W x 3.94" D
- Weight: 22.05lbs
- Connectivity: Ethernet, USB (service port only)
